Thursday 29 March 2018 from 7.30 pm

“Mercury: a Relative Planet” an audio visual presentation by Andrew Lound for a general audience

Mercury is the closest planet to the Sun and, due to the difficulty in observing it, has been neglected over the years. Yet this planet has helped change our view on the motions of the planets, nearly ruined the career of a famous astronomer and perhaps may hold the key to planetary formation. The whole history of the observation of Mercury will be examined including the latest NASA images from the Messenger spacecraft. Illustrated with remarkable images, accompanied by music this presentation will forever change the way we think of Mercury.

£3 at the door. All welcome!

Coffee, tea and biscuits provided.
